Option 1: Quest Blueprint for Wellness (available through May 31, 2016)
NOTE: BASF sites with on-site clinics* are not eligible for the Quest Blueprint for Wellness program. See Option 3 below.

- **On-site Screening** – Some sites hold on-site screenings for biometric data administered by Quest Diagnostics. If you are screened at one of these sites, you can register for an appointment on site (follow your site’s procedure for scheduling). Then you will simply need to sign a release the day of your screening authorizing Quest to send your data directly to Virgin Pulse. Your biometric data will be sent directly to Virgin Pulse and you will receive credit (in the form of points).

- **At a Local Quest Diagnostic Center** – Register for a screening through Quest Diagnostics at My.BlueprintForWellness.com. To register, you will need to enter the registration key **BASF** and your employee ID number. Then visit your local Quest lab at the scheduled time. Results will be sent directly to Virgin Pulse. (Note: Covered spouses/partners, while eligible for Healthy YOU, are ineligible for local and on-site Quest screenings.)

Option 2: See Your Doctor When You Are Well

- Schedule an annual wellness exam** with your doctor and have him or her complete the Health Care Provider Form (HCPF). Return it to Virgin Pulse per the instructions on the form.

Option 3: At a BASF Site Clinic

- If you had a screening at a BASF site clinic (e.g. a ‘fit for duty’ exam), or would like a screening completed, you may utilize the on-site clinic to get your key health values for Healthy YOU. Once an appointment is scheduled with your on-site clinic nurse, log in and print your Healthcare Provider Form (HCPF) and bring it with you to your appointment. Once your results are available from your on-site clinic, complete the form and return it to Virgin Pulse per the instructions on the form. Note: your form is unique to you (contains a unique ID).

---

* Except Florham Park

** Under Health Care Reform, preventive visits are no-cost for plan members under BASF medical plans.
